

RECIPE OUTLET LINKING MANUAL

Currently, all recipes under recipeTypeCode ='retail' are displayed / selectable in all outlets. This program is used to link retail items to an outlet.

To link

1. Select the **Recipe Type**, only recipeTypeCode ='retail' will appear in the dropdown.
2. You can also search for the recipe name and click **search**.
3. Select the **recipe(s)**.
4. Select the outlet, this means, that the recipe selected will only be displayed in the POS at the selected outlet.
5. Click **Submit** when done.

The screenshot shows the DeCliff system interface for 'Recipe Outlet Linking'. The top header includes the DeCliff logo, user information (Shields Piel - F&B, Department: FOOD & BEVERAGE, Position: F&B Assistant, Currently you are working in this property: DECLIFF PHILIPPINES), and the date/time (Monday, January 30, 2023 12:31:37 pm, Version 10.000.02). The main navigation menu on the left lists various system modules, with 'Recipe Outlet Linking' selected under the 'Food & Beverage' section. The main content area displays a table with two columns: 'Recipe Name' and 'Outlet Name'. The 'Recipe Name' column lists 'Acer', 'Retail', and 'Shark and Ray keychain'. The 'Outlet Name' column lists 'AA Retail Tax Exc SC Exc', 'JJ Retail Tax Inc SC Exc', 'Ocean Toys Tax Inc SC Inc', and 'XYZ Retail Tax Exc SC Inc'. The 'AA Retail Tax Exc SC Exc' row is highlighted in cyan, and the 'Shark and Ray keychain' row has a blue checkmark in the 'Recipe Name' column. A message above the table states 'There is a link between the outlet(s)'. At the bottom, there are pagination controls for 'Recipe(s)' (1-3 from 3) and 'Outlet(s)' (1-4 from 4), and a 'Submit' button.

Recipe Name	Outlet Name
Acer	AA Retail Tax Exc SC Exc
Retail	JJ Retail Tax Inc SC Exc
Shark and Ray keychain	Ocean Toys Tax Inc SC Inc
	XYZ Retail Tax Exc SC Inc
